

# ABOUT US

From humble beginnings late last century in a garage in Bulleen, Bulleen Screens has grown to be a trusted name in the building trade. In 2011, we moved our manufacturing and offices to Oakleigh (but kept our name....) to accommodate growth in the business and a new custom designed factory. Centrally located in Melbourne, we now service anywhere within 50km of the GPO, along with regular trips to the Mornington Peninsula, Geelong, Ballarat, Kilmore and Pakenham. We service a range of highly regarded trade customers and also welcome the public to buy direct.

Drawing on knowledge gained from over 40 years in the window and door trade, we manufacture a wide range of quality Flyscreens and Security Screens for Doors and Windows. Our customised range includes Flyscreen Doors, Decorative Aluminium & Steel Security Doors, INVISI-GARD Security Doors and Windows and Flyscreen Windows. We pride ourselves on being able to offer a wide range of options in style, colour, mesh types, durability and overall security to meet your individual needs.

**Browse through this brochure to view our wide range of options to suit your needs, then contact us for a rough estimate or to arrange your onsite measure & quote.**

Victoria, Australia, 3166

# SERVICES

**We pride ourselves on being the experts in the Industry and providing excellent service to meet our different customer needs.**

We are proud of the reputation we have built over the years working with window companies, architects, builders and maintenance trades and have developed ways to be flexible in our approach. We are now excited to work directly with residential clients extending our expertise so everyone can enjoy the benefits of our vast experience in Door and Window Screens and Security Doors.

**We have several ways of working with our customers.**

## MANUFACTURE ONLY

We are happy to manufacture screens or doors to sizes and specifications provided by you, either for collection from us, or, for an additional fee, delivery to your site.

- By eliminating the need for us to schedule a site measure before manufacture this cuts down the lead time between order and delivery. It also means a lower cost to you as we spend less time on the job.
- This is only recommended for simple jobs or where the customer has installation expertise as the risk on sizes and colour is with you rather than us. If we manufacture to the sizes provided and the product does not fit we will happily rework the item to the correct size however the cost of this will be borne by you.
- For residential customers with simple window flyscreen needs this can be a very cost effective way to replace an existing screen – simply measure your old screen or bring it in to us at our showroom to measure, colour match and copy.
- To proceed with manufacture we require all details in writing.

## MANUFACTURE AND INSTALL

The same approach as Manufacture only, however with the piece of mind knowing a skilled tradesperson will come an install the product.

## MEASURE, QUOTE, MANUFACTURE AND INSTALL

- Our most popular way of working providing you with the confidence that your selected products will be measured and fitted by the experts. We take all of the risk on getting sizes and colours correct.
- Our team specialise in this work, leading to a top quality result.

Can take a little longer to arrange as we need to schedule a mutually convenient time to complete an onsite measure, complete a quote and for installation. Is more expensive than simply manufacturing an item to your provided specifications.

## REPAIRS

If you have an existing screen door or window that needs to be re-meshed we're happy to discuss repairing for you.
